

■ Rajat Khirwadkar - Portfolio Website Presentation

Slide 1: Title

Rajat Khirwadkar - Personal Portfolio Website

Internship Week 1 Assignment

Built using **only HTML**

Slide 2: Project Objective

To create a **basic personal portfolio website** using **only HTML**.

This project demonstrates my understanding of HTML structure, layout, and web page organization.

Slide 3: Features Implemented

- ✓ Sticky navigation bar using HTML `<header>`
 - ✓ About Me section using `<section>` and `<p>` tags
 - ✓ Projects section using headings and paragraphs
 - ✓ Contact form using `<form>`, `<input>`, and `<textarea>`
 - ✓ Footer with links using `<footer>`
 - ✓ Scroll to top button using `<button>` (linked to top of the page)
-

Slide 4: Technologies Used

- ✓ HTML5
 - Pure structure created with HTML tags
-

Slide 5: What I Learned

- How to divide a web page into multiple sections □ Proper use of tags like `<header>`, `<section>`, `<form>`, `<footer>`
- Creating a contact form using basic input elements
- How to make a structured resume-like webpage using only HTML

Slide 6: Output Screenshot (Optional)

📷 Paste screenshot of your portfolio webpage here if asked.

Slide 7: Summary

This HTML-only portfolio helped me strengthen my foundation in web development. It prepared me to now move forward with CSS, JavaScript, and responsive design in the next tasks.
